ABSTRACT

This report presents information comparing the University of Hawaii Community Colleges (UHCC) to benchmark and peer-group institutions on selected financial measures. The primary data sources for this report were the Integrated Postsecondary Education Data System (IPEDS) Finance Survey for the 1995-1996 fiscal year and the IPEDS Fall Enrollment Survey for the fall of 1995. This report found that full-time equivalent (FTE) enrollments increased by three percent from the 1992-1993 fiscal year to the 1995-1996 fiscal year. During this same time, total revenues per FTE decreased by fourteen percent while total expenditures per FTE student remained about the same. In contrast, for the benchmark group, FTE enrollment declined by six percent during this period, while both the total revenues and total expenditures per FTE student increased by thirteen percent. State appropriations accounted for more than three-fourths of total revenues at the UHCC, much of which was distributed to instructional needs, which comprised of more than half of total expenditures. The UHCC devoted more of their resources to instruction, academic support, and public services and less on library and student aid than their peer-group institutions. Appendices A through G include supplemental data tables. Definitions of the benchmark and peer groups, as well as descriptions of the various financial measures presented in the tables, may be found in Appendix H. (TGO)

REVENUES & EXPENDITURES: PEER AND BENCHMARK COMPARISONS
UNIVERSITY OF HAWAII COMMUNITY COLLEGES
FISCAL YEAR 1995-96

Introduction and Sources

This report presents information comparing the UH Community Colleges to benchmark and peer group institutions on selected financial measures. Included are data on enrollment, revenues and expenditures. The raw numbers have been converted to a full-time equivalent (FTE) basis to facilitate comparison between institutions with varying enrollment.

The primary data sources for this report were the Integrated Postsecondary Education Data System (IPEDS) Finance Survey, FY 1995-96 and the IPEDS Fall Enrollment Survey, Fall 1995. The immediate source is data provided by Research Associates of Washington. The database provided by Research Associates contains financial data per FTE student already calculated. (The method used by Research Associates to calculate FTE differs from that used to calculate the FTE reported elsewhere.) Definitions of the benchmark and peer groups, as well as descriptions of the various financial measures presented in the tables, may be found in Appendix H.

Description of the Tables

Tables 1 and 2 provide information from fiscal years 1992-93 to 1995-96 (four years) for UH Community Colleges (UHCC) in aggregate and its benchmark group. Table 1 displays data on FTE enrollment, revenues and expenditures per FTE student for UHCC and averages from its benchmark group. Table 2 compares the ranking of UHCC (highest =1) to institutions in the benchmark group. Also shown in Table 2 are the percent differences of UHCC's data from the benchmark group's average.

Tables 3 through 5 summarizes information for individual campuses within UHCC. Table 3 shows the difference in percentage for each campus from its peer group's average. The ranking of the campuses in comparison to other colleges in its peer group is displayed on Table 4. Table 5 shows the percent change in enrollment, revenues and expenditures from FY 1992-93 to FY 1995-96.

Tables 6 through 9 provide information for each campus in the UHCC system **benchmark** group for fiscal year 1995-96. Table 6 shows data on FTE enrollment, revenues and expenditures per FTE student. The range of values for each item (high and low) and a mean value for the benchmark group (excluding UHCC) are shown at the bottom of each column. The difference in percentage for UHCC from its benchmark average and the rank for UHCC are also shown. Table 7 displays the percent distribution of revenue and expenditure items for each campus. Tables 8 and 9 are similar to Tables 6 and 7, except that the UHCC figures include the UH systemwide and UHCC systemwide revenues and expenditures, apportioned across UH campuses (see Appendix H, *Systemwide Revenues & Expenditures*, for more discussion). The UHCC benchmark group institutions are listed in Table 10.

A similar set of tables is provided for individual campuses in the UHCC system (Appendixes A to G). Tables 1 and 2 in each series provides historical information from fiscal years 1992-93 through fiscal years 1995-96. Tables 3 through 6 provide data for fiscal year 1995-96 in comparison to the corresponding **peer** group institutions. The seventh table in each series lists the institutions in the relevant peer group.

The tuition and fees revenues shown in the tables for UHCC were returned to the State of Hawai'i General Fund for fiscal years 1992-93 through 1994-95. However, they are listed here for comparative purposes under tuition and fees instead of under appropriations.

Highlights

Enrollment

- ! In Fall 1995, UHCC had FTE enrollment of 16,183, 3% lower than last fiscal year (Table 1).
- ! UHCC ranked 2nd among 12 schools in its benchmark group and was 34% higher than the benchmark group average of 12,078 (Table 6).
- S Hawai'i CC, Honolulu CC, Kapi'olani CC and Maui CC exceeded their respective peer groups in average FTE enrollment, while Kaua'i CC, Leeward CC and Windward CC were below the average (Table 3).

Revenues

- ! Total revenues per FTE student for UHCC were \$4,941 in fiscal year 1995-96, 15% lower than amounts received the previous fiscal year.
- S UHCC ranked 10th of 12 in total revenues and was 28% lower than the benchmark group average of \$6,826 (Table 6).
- S With the addition of systemwide revenues, total revenues for the UHCC increased 10% to \$5,426; the benchmark group ranking improved to 9th (Table 8).
- ! State appropriations and tuition & fee revenues were low.
- S For state appropriations, UHCC ranked 9th of 12 and, generally, the individual campuses also ranked low except for Kaua'i (Table 4).
- S Although revenues from tuition and fees increased 34% from last fiscal year, UHCC ranked second to last in its benchmark group. An increase in tuition and fees revenues were reflected in each campus but they also continued to rank low in their peer group.

- ! All campuses except for Kaua'i CC fell midway or in the latter half of their respective peer groups in average total revenues (Tables A2 to G2 & Tables A3 to G3).
- S Kaua'i CC was 12% above its peer group's average and ranked 4th of 16 (Tables 3 & 4, Figure 8).
- S Hawai'i CC was 40% below the average and ranked last in its peer group. Windward CC was 21% below the average and ranked 3rd to last. *(Revenue figures for Hawai'i CC may be understated due to the inclusion of certain items with UH Hilo).*
- ! From FY1992-93 to FY1995-96, total revenues decreased 14% for UHCC, while average total revenues for the benchmark group increased 13%. (Table 1, Figure 3).

Expenditures

- ! Total expenditures per FTE student for UHCC were \$6,857 in FY 1995-96, a nominal decrease of .1% from last fiscal year.
- S UHCC ranked 9th of 12 and was 20% lower than the benchmark group average of \$8,613 (Table 6).
- S With the addition of systemwide expenditures, total expenditures for the UH Community Colleges increased 11% to \$7,637; the benchmark group ranking improved to 8th (Table 8).
- S Honolulu CC, Kaua'i CC and Maui CC ranked at the higher end, where Kaua'i CC ranked first in its peer group.
- S Hawai'i CC, Kapi'olani CC, Leeward CC and Windward CC ranked at the lower end, where Hawai'i CC ranked last in its peer group. *(Expenditure figures for Hawai'i CC may be understated, however, due to the inclusion of certain items with UH Hilo).*
- ! Rankings for the individual UH Community College campuses varied widely for each expenditure category (Table 4). In general, the campuses ranked:
 - S higher in instruction, academic support and public service expenditures
 - S lower in library and student aid expenditures
- ! The addition of systemwide expenditures increased the per FTE calculation and peer group ranking for institutional support significantly for most campuses.

- ! From FY 1992-93 to FY 1995-96, total expenditures for UHCC increased just 1% whereas the benchmark group's average increased 19% (Table 1, Figure 4).
- S Total expenditures increased for Honolulu CC, Kaua'i CC, Maui CC and Windward CC (Table 5, Figure 9).
- S Total expenditures decreased for Hawai'i CC, Kapi'olani CC and Leeward CC.
- S Average total expenditures increased for all peer groups (Figure 9).

Summary

FTE enrollment at the UHCC increased 3% from FY1992-93 to FY 1995-96, while total revenues per FTE student decreased 14% and total expenditures per FTE student remained relatively stable, increasing by only 1% (Figures 5 through 7). In contrast, for the benchmark group, FTE enrollment on average declined 6% over this period, while both total revenues and total expenditures per FTE student were up 13%. This pattern generally held true at the individual UHCC campuses: FTE enrollments increased faster than the peer groups, while total revenues and total expenditures increased more slowly (Table 5). *Changes in average enrollment, revenues and expenditures could be due in part to a different peer group make-up in FY 1995-96. (See Appendix H, Terms and Definitions, Benchmark and Peer Groups).*

As in the past three fiscal years, state appropriations accounted for more than three fourths of total revenues at the UHCC, much of it going to instruction which comprised of more than half of total expenditures (Table 7). The UH Community Colleges devoted more resources on average to instruction, academic support and public service and less on library and student aid than their peer group institutions.

1/ Due to fiscal interconnections between Hawaii CC and UH Hilo during the time period covered in this report, revenue and expenditure items at Hawaii CC may have been included with UH Hilo.

Therefore, the figures given here for Hawaii CC may be understated.

2/ Tuition revenues for FY92-93 through FY94-95 were returned to the State of Hawaii general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations".

3/ Library is included in Academic Support.

4/ Peer group was updated effective April 1998 by NCHEMS, therefore, beginning FY 95-96 data are compared against the new peer group.

1/ Due to fiscal interconnections between Hawaii'i CC and UH Hilo during the time period covered in this report, revenue and expenditure items at Hawaii'i CC may have been included with UH Hilo. Therefore, the figures given here for Hawaii'i CC may be understated.

2/ Library is included in Academic Support.

Note: Peer group was updated effective April 1998 by NCHEMS, therefore, beginning FY 95-96 data are compared against the new peer group.

1/ Tuition revenues for FY92-93 through FY94-95 were returned to the State of Hawai'i general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations".
2/ Library is included in Academic Support.

3/ Peer group was updated effective April 1998 by NCHEMS, therefore, beginning FY 95-96 data are compared against the new peer group.

4/ Percent differences were not computed for items when the amounts for both Kaua'i CC and the peer group were less than \$200 per FTE student.

- 1/ Tuition revenues for FY92-93 through FY94-95 were returned to the State of Hawai'i general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations".
- 2/ Library is included in Academic Support.
- 3/ Peer group was updated effective April 1998 by NCHEMS, therefore, beginning FY 95-96 data are compared against the new peer group.

- 1/ Tuition revenues for FY92-93 through FY94-95 were returned to the State of Hawai'i general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations".
- 2/ Library is included in Academic Support.
- 3/ Peer group was updated effective April 1998 by NCHEMS, therefore, beginning FY 95-96 data are compared against the new peer group.
- 4/ Percent differences were not computed for items when the amounts for both Windward CC and the peer group were less than \$200 per FTE student.

APPENDIX H

TERMS AND DEFINITIONS

Benchmark, Peer Groups: The terms “benchmark” and “peer” are used here to differentiate between comparative groups developed internally at the University of Hawai‘i and those developed more systematically by the National Center for Higher Education Management Systems (NCHEMS). In particular, the **benchmark** groups reflect input from campus executives. The list of benchmarks for the UH Community Colleges (UHCC) were developed with input from the Chancellors’ offices and have evolved and changed over the years. The institutions included in the **peer** groups for the individual UH Community College campuses were developed more recently by Dennis Jones at NCHEMS. NCHEMS Information Services provide a Comparison Group Selection Service, and we contracted with them to develop comparative groups for each UH campus. NCHEMS uses an indicator database containing variables covering institutional characteristics, faculty, finance, degrees awarded, enrollments, and other data. Professional judgment was also involved in this selection process. (Source: UH Office of Planning & Policy, 8/94).

Benchmark comparison data are included in this report for the UH Community College system in Tables 6 to 9. Peer comparison data are found in Tables A1 to G6. Effective April 1998, peer groups for the individual campuses were updated by NCHEMS, therefore, beginning fiscal year 1995-96, data for each campus were compared against its new peer group.

Systemwide Revenues & Expenditures: Systemwide revenues and expenditures refer to revenues and expenditures of University of Hawai‘i system offices. Comparison data which include systemwide figures are found in Tables 8 and 9 for the UH Community Colleges system and in Tables 5 and 6 in the appendix series for each UHCC campus. Systemwide revenues were apportioned by Level IV program according to each campus’ share of the total revenues for each program. Systemwide expenditures were apportioned by Level IV program according to each campus’ share of the total expenditures for each program.

Total Revenues: Total revenues are calculated by summing revenues for three items: *tuition and fees, state appropriations, and private gifts, contracts and endowment income*. Although tuition revenues in FY 1994-95 were returned to the State of Hawai‘i general fund for all the University of Hawai‘i campuses, they are included in this report under tuition and fee revenues for comparative purposes

Total Expenditures: Total expenditures are calculated by summing expenditures for *instruction, student services, academic support, institutional support, operations and maintenance, funded research, public services and student aid*.

The following definitions are from the publication entitled: Higher Education Revenues & Expenditures, FY 1994-95.

FTE Fall Enrollment: Full-time-equivalent (FTE) enrollment is the sum of the fall count of full-time students (those whose academic load of course work or other required activity is at least 75 percent of the institution's normal full-time load) plus one-third of the fall part-time student count. Students reported in this fall count include those taking work creditable toward an associate or bachelor's degree and those students enrolled in a vocational or technical program that is normally terminal and results in some other formal recognition below the baccalaureate degree. Students taking these types of courses through correspondence study are included. Students *not* reported include those enrolled in non-credit adult education courses and non-credit extension courses, auditors, students studying abroad if their enrollment is only an administrative record and the fee is nominal, students in any branch campus or extension center in a foreign country, high school students taking college courses, and students known to be enrolled concurrently at another college or university reporting their enrollment.

Percent Graduate Students: Ratio of graduate enrollment to total headcount enrollment.

Tuition and Fees: All tuition and fees (including student activity fees) assessed against students for education purposes. Included here are tuition and fee remissions or exemptions even though there is no intention of collecting them from the student. (An amount equal to such remissions or exemptions should be reflected as expenditure and classified in the category Scholarships and Fellowships or preferably as staff benefits.) Tuition and fees that are remitted to the state as an offset to the state appropriation are included. If the assignment of student fees to any capital or plant account is an administrative action only, or is subject to change by the governing board, then such fees should be reported here as current funds tuition revenues. Pledged tuition revenues under bond indenture agreements should also be reported here (a mandatory transfer of these amounts to the Plant Fund can then be reported). An exception are monies from tuition and fees assessed by binding external restrictions specifically for debt service on institutional plant or for plant renewals, replacement, or expansion, which should be reported as direct additions to Plant Funds. Tuition collected from Basic Educational Opportunity Grants (BEOG) recipients should be reported here. Charges for room and board, and other services rendered by auxiliary enterprises are *not* reported here. Fees assessed for student health services that are operated as a service to the student body rather than as an auxiliary enterprise should be included.

This category reports *gross* tuition revenues including any portion paid through receipt of student aid from all sources including institutionally administered financial aid. To avoid double counting of state revenues, appropriated student financial aid administered by the institution should be reported only once as an appropriation and *not* as a component of tuition revenue. Similarly, revenues from endowment income and gifts used for student financial aid should be reported as income from these sources and not as tuition revenue.

State Appropriations: Unrestricted and restricted current funds revenues from state and local government appropriations. Appropriations include all monies received by the institution for current operating expenses including student financial aid (*not* for specific

projects, programs, or organizational units) through acts of the state legislature and local governments, except grants and contracts. Appropriations for hospitals are excluded. Federal monies stipulated for higher education and only administered by the state (e.g., federal Morrill Act land grant appropriations and Bankhead-Nelson Appropriations) are excluded. Federal government funds distributed to the state for unspecified general purposes (e.g., federal revenue sharing funds) which the state then elects to appropriate to the institution are included. Funds disbursed by a government agency to an institutional account, such as payments into a state or local government retirement system on behalf of the institution, should be included. Tuition and fees revenues collected by the institution, remitted to the state, and then returned to the institution in the form of appropriations, must be subtracted from the gross appropriations figure and separately reported as tuition. When appropriations are reverted or lapsed to the appropriating agency, only the *net* appropriations should be reported.

Private Gifts, Contracts and Endowment Income: Gifts and contracts include unrestricted and restricted current funds revenues (for student financial aid, for example) from private donors for which no legal consideration is involved, and revenues from private contracts for which specific goods and services are provided. Such income includes only those gifts, grants, and contracts that are directly related to instruction, research, public service, or other primary institutional missions (as opposed to land rental or utility services, for example). Excludes gifts and grants and contracts for hospitals. Includes monies received as a result of gifts, grants, or contracts from a foreign government, and estimated dollar amounts of contributed services. Excludes revenues derived from the sale of goods and services *incidental* to the conduct of instruction, research, or public service, even if the institution has a contract with the recipient of the goods and services. Income from funds held in revocable trusts or distributable by direction of the trustees of such trusts should be reported under this classification. Related indirect costs recovered should also be reported in this category.

Endowment income includes unrestricted and restricted current funds revenues from endowment and income from funds held in trust by others under irrevocable trusts to the extent expended for current operating purposes. Expenditure of capital gains from such funds should be treated as transfers and not included. Endowment income used for hospitals is excluded. Institutions that have adopted a spending formula by which they expend not only the yield but also a prudent portion of the appreciation of the principal, should report the amount calculated by the "total return" concept. The amount so calculated should be adjusted for protection of the endowment principal from its loss of purchasing power if that provision is part of the spending formula.

Instruction: The instruction category includes expenditures of the institution's colleges, schools, departments, and other instructional divisions for credit and non-credit general academic instruction, occupational and vocational instruction, continuing and community education, special session instruction, preparatory and adult basic education, and remedial and tutorial instruction conducted by the teaching faculty. Expenditures for departmental research and public service that are *not* separately budgeted should be

included in this classification. Expenditures for academic administration where the primary function is administration (e.g., academic deans) should be reported as part of Academic Support.

Student Services: This category includes funds expended for recruitment, admissions, registrar activities, and activities whose primary purpose is to contribute to the emotional and physical well-being of students, and to their intellectual, cultural, and social development outside the context of the formal instructional program. Examples are student activities, cultural events, student newspapers, student organizations, intramural athletics, intercollegiate athletics (if the program is operated as an integral part of the department of physical education and not as an essentially self-supporting activity), counseling and career guidance (excluding informal academic counseling by the faculty), student financial aid administration, and student health services (except where operated as a self supporting auxiliary enterprise). Student services includes the administrative allowance for Pell Grants.

Academic Support: This category includes expenditures for support services that are an integral part of the institution's primary mission of instruction, research, and public service. It includes expenditures for libraries (also reported separately), demonstration schools, museums, galleries, audio/visual services, academic computing support, ancillary support, academic administration (including academic deans, but not department chairpersons), personnel development, and course and curriculum development. Expenditures for veterinary and dental clinics are included if their primary purpose is to support the institutional program.

Libraries: Libraries, a subset of Academic Support, includes expenditures for organized activities that directly support the operation of a cataloged or otherwise classified collection of published material. The Libraries entry includes expenses for the purchase of books and all forms of collected communications.

Institutional Support: Institutional support includes expenditures for the day-to-day operational support of the entire institution, excluding expenditures for physical plant operations. Included are expenditures for general administrative services, executive direction and planning, legal and fiscal operations, administrative data processing, space management, employee personnel and records, logistical activities, public relations/development, and campus security. Allocations of institutional support should be made to auxiliary enterprises, hospitals, etc., and not reported here. Staff benefits and college work-study funds should not be reported in a lump sum in this category, but are distributed to all functions. Prorated shares of state-level coordinating board and other types of state system expenses assigned member institutions should be included in this category.

Operation and Maintenance of Plant: Included here are all expenditures for operations established to provide service and maintenance related to grounds and facilities used for educational and general purposes. This includes expenditures for utilities, custodial

services, fire protection, property insurance, landscape and grounds maintenance, major repairs and renovations, and similar items. In all cases, expenditures are net amounts charged to auxiliary enterprises, hospitals, and independent operations. Campus security is not included here. This category also does not include capital expenditures made from the Plant Funds accounts.

Estimated Full Instructional Expenditures: Defined by Research Associates as the sum of direct expenditures for instruction and student services plus prorated indirect costs. The indirect instructional costs equal total academic and institutional support and operation and maintenance of plant less overhead for funded research and public services, estimated as 30 percent of the expenditures for these two functions.

Funded Research: The Research category includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. Subject to these conditions, it includes expenditures for individual and/or project research as well as for research institutes and centers. Excluded are discretionary (not separately budgeted) expenditures for departmental research and funds used for non-research sponsored activities such as training programs.

Public Service: Funds expended for activities that are primarily to provide non-instructional services that are beneficial to individuals and groups external to the institution. These activities include community service programs (excluding instructional activities) and cooperative extension services. Extension services are generally located off-campus in non-institutionally owned facilities. Included in this category are conferences, institutes, general advisory services, reference bureaus, radio and television, consulting, and similar non-instructional services to particular sectors of the community.

Student Aid (Scholarships and Fellowships): This category includes expenditures given in the form of outright grants (recipients are not required to perform any service as consideration) and trainee stipends, prizes, and awards to individuals enrolled in formal course work, either for credit or non-credit. Both merit (including athletic and music scholarships) and need-based awards are included. Awards given to individuals who are not enrolled in formal course work are excluded. If the institution is given custody of the funds, but is not allowed to select the recipient of the grant \$ for example, Federal Basic Educational Opportunity Grants program or ROTC scholarships \$ the funds should not be reported. When services are required in exchange for financial assistance, as in the Federal College Work-Study Program or an institution-sponsored work-study program, the charges should be classified as expenditures of the department or organizational unit to which the service is rendered and not reported here. Aid to students in the form of tuition or fees remissions should be included. (Remissions that are granted because of faculty or staff status are charged to staff benefits and not included here.) Pell Grants are reported as a federal allotment and not in this category. Note: institutional expenditures for student aid are *not* part of the costs of instruction, but rather a redistribution of income function.
